

Newnigma2 stable DM800 v3.3.2

Newnigma2 stable DM800 v3.3.2

#####

Newnigma2 team proudly presents:

Newnigma2 v3.3.2

#####

Basics:

- Enigma2 3.2.2: **27.03.2012**
- Enigma2 Plugins: **29.03.2012**
- Newnigma2 Plugins: **29.03.2012**

DM 800 HD PVR

- driver: **16.02.2012**
- secondstage: **84**
- kernel: 2.6.18

Notice: **Onlineupdate from v3.3.* is possible.**

Changes:

- Update: libdvdnv and libdvread
- Update: brushedalu-hd, elgato-hd, dmconcinny-hd, kerni-hd1, kerni-hd1r2 and yads-hd with new screen (see below)
- Bugfix: fixed newnigma2-hd (RC's)
- Bugfix: fixed possible crash with infinity.mod.newnigma2-hd
- Bugfix: fixed double entries in the device list
- Bugfix: fixed devicemanager fusermount (djmound)
- Bugfix: fixed picon flash destination (OSD Settings)
- Bugfix: fixed default settings, default RC dm500hd, dm7020hd
- Bugfix: fixed Configsaver (keymap_custom.xml)
- Added: minidlina ([click here for more information](#))
- Added: enigma2-plugin-systemplugins-3dsettings (thx to Dr.Best)
- Added: enigma2-plugin-systemplugins-vps
- Added: enigma2-plugin-extensions-eurotictv (thx to DMM)
- Added: enigma2-plugin-extensions-ecasa (thx to ritzmo)
- Added: util-linux-ng-blkid and kernel-module-cdc-acm to our feeds
- New: plugin enigma2-plugin-newnigma2-sportportal ([click here for more information](#))
- New: plugin enigma2-plugin-newnigma2-mediastomb with gui configuration ([click here for more information](#))

- New: plugin [enigma2-plugin-newnigma2-eporner](#) ([click here for more information](#))
- New: userfriendly FTP feature of [enigma2-plugin-newnigma2-vpn](#)
- For Skinners: new screens (menu -> settings -> system -> harddisk):
HarddiskDriveSelection - HarddiskDriveSetup - HarddiskMountpointBrowser

Since e2 v3.2.2 u have to put following screen into your skin.xml: RecordPathsSettings. This screen is removed out of the plugin and it would crash, if u dont have it in your skin.xml

- Info: ftdi patch for kernel 2.6.18 added. that patch enables triple/quad reader support.
- Info: google gears support has ended. please uninstall it, if u installed it.
- Info: mkv + idx/sub not longer work with new e2. pls feel free to post in dmm forum.
- changelog e2: [Enigma2](#)

Only necessary if there is no actual image with SecondStage 84 installed.

IMPORTANT: Starting today (that was 05.09.2011) images for the models **DM500HD**, **DM800 SE** and **DM800HD PVR** include an improved flash error correction feature.

In order to benefit from the improvements, it is required that you either flash the new image with the latest version of DreamUP ([V1.3.3.9](#)) or flash a new second stage loader (DM500HD DM800HD PVR DM800 SE) before flashing the image via your browser or other means.

Nur notwendig wenn noch kein aktuelles Image mit SecondStage 84 auf der Box installiert ist.

WICHTIG: Seit dem heutigen Tag (das war der 05.09.2011) enthalten die Images für die Dreambox Modelle **DM500HD**, **DM800 SE** und **DM800HD PVR** eine verbesserte Fehlerkorrektur für den Flash-Speicher.

Um die Neuerungen benutzen zu können, muss entweder ein vollständiges, neues Image mit der neuesten Version von DreamUP ([V1.3.3.9](#)) geflasht werden, oder zunächst ein neuer Second Stage Loader (DM500HD DM800HD PVR DM800 SE) installiert werden, bevor darüber ein neues Image geflasht wird.

SECONDSTAGE DOWNLOAD: [DM800](#)

[here u can find USB to UART driver](#)

info: since release of e2 v. 3.2 there is no dm7025 support yet. that's what dmm said.

Multiboot: No support for multiboot. Not planned. No need for such a tool.

GP3wizard: No support for gp3wizard. Probably not running. Not needed in Newnigma2 environment.
